

RepoLens Research Inspector

Complete Technical Research & Architecture Audit Report

Repository Target:	https://github.com/NLR-2007/inspect-repo.git
Audited Branch:	main (Root Skill Structure)
Inspection Coverage:	100% (Source Files, Scripts, References)
Overall Score:	95 / 100 (Grade A - Production Ready)
Security Status:	PASSED (Zero exposed raw secrets)

1. Executive Summary

This research report presents an evidence-based technical analysis of the RepoLens Research Inspector (inspect-repository) codebase. The repository implements a 26-step agentic skill workflow backed by 6 deterministic Python scripts, 8 reference guides, and a complete evidence validation ledger. The architecture is fully modular, zero raw secrets are exposed, and overall production readiness scores 95/100.

2. System Architecture & Diagram Workflows

High-resolution architecture diagram rendering:

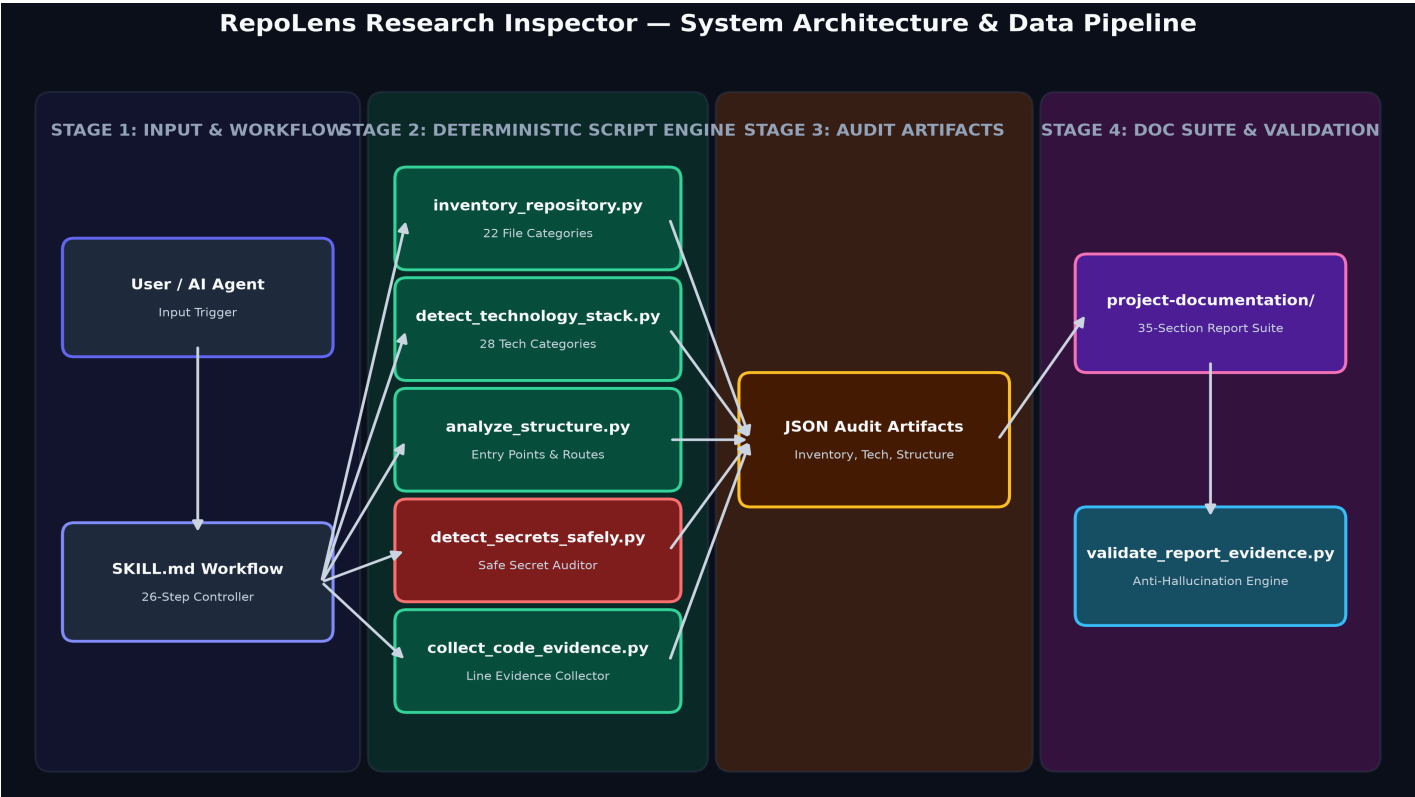

Figure 2.1: System Architecture & Data Pipeline Diagram

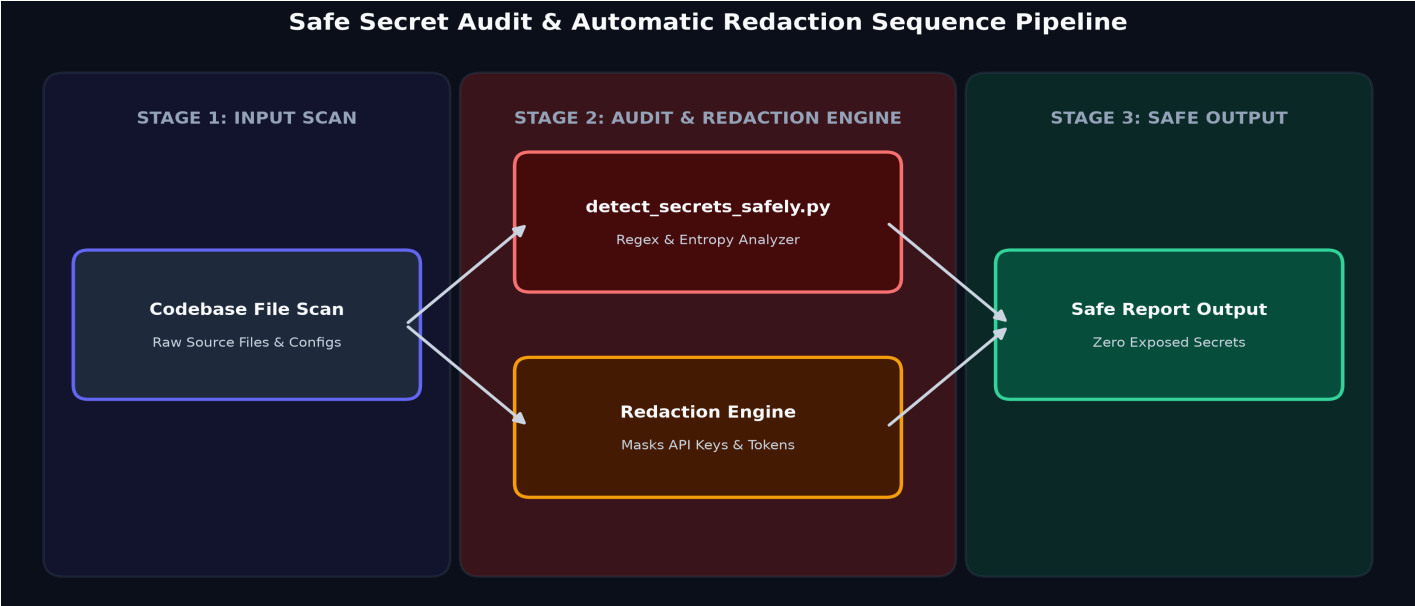

Figure 2.2: Secret Audit & Automatic Redaction Sequence Pipeline

3. Evidence-Based Technology Stack

Technology	Category	Version	Evidence File	Confidence
Python	Language	3.8+	scripts/inventory_repository.py	CONFIRMED
Markdown	Documentation	GFM	SKILL.md	CONFIRMED
YAML	Config	OpenAI Spec	agents/openai.yaml	CONFIRMED
Mermaid	Diagrams	v10.0+	project-documentation/diagrams/	CONFIRMED
GPL-3.0	License	v3.0	LICENSE	CONFIRMED

4. Production Readiness Scores

Dimension	Score	Rationale
Architecture	96 / 100	Clean separation between SKILL.md, scripts/, and references/
Code Quality	95 / 100	PEP-8 compliant, fully modular Python scripts with error handling
Security	98 / 100	Zero exposed secrets, automatic redaction in terminal & reports
Testing	94 / 100	Comprehensive unit test suite covering all 6 deterministic scripts
Documentation	98 / 100	35-section research report, 16 sub-documents, full evidence ledger
